

Returns handling process for H Class Dust Extractors

All **H** Class Dust Extractors **MUST BE** decontaminated and packaged in accordance with the below guidelines when they are returned to a Total Tools store for any reason.

Failure to adhere to these guidelines will result in non-acceptance of the equipment.

Decontaminate the outside of the extractor by using the extractor.

Remove all accessories, hoses and brushes from the extractor.

Remove the bag from inside the extractor ensuring the tub is empty.

Wipe down the exterior of the extractor using wet wipes.

Ensure the unit is closed and the intake cap is in place.

Place the extractor into a 200UM clear bag and tape using duct tape. Repeat this process twice.

Total Tools will not accept any hazardous extractors not prepared in this manner.
